

Announcement from Institutional Research

Transition to Modern Data Analytics Tools

Hypothetical Scenario

Imagine you have a **MacBook** you use for work, but this summer you will need to transition to a **Windows** operating system. Additionally, this summer **German** will become the official language of the college, requiring you to conduct all your work in a new language.

The Challenge

Would you be able to keep up with your existing workload while preparing for this transition?

Current Team Situation

- New data visualization tool
- New programming language

```
<tr class="row-1 row-first row-last">
  <td class="col-1 col-first">
    <div class="views-field views-field-title"> <span class="field-content"> <a href="/yellowleather/products/shoes/confy-leather-shoes">
    <div class="views-field views-field-uc-product-image">
      <div class="field-content">
        <a href="/yellowleather/products/shoes/confy-leather-shoes">
      </div>
    </div>
    <div class="views-field views-field-display-price"> <span class="views-label views-label-display-price">
    </div>
  </td>
  <td class="col-2">
    <div class="views-field views-field-title"> <span class="field-content"> <a href="/yellowleather/products/belts/embossed-spread-wing-eagle-belt">
    <div class="views-field views-field-uc-product-image">
      <div class="field-content">
        <a href="/yellowleather/products/belts/embossed-spread-wing-eagle-belt">
      </div>
    </div>
    <div class="views-field views-field-display-price"> <span class="views-label views-label-display-price">
    </div>
  </td>
  <td class="col-3 col-last">
    <div class="views-field views-field-title"> <span class="field-content"> <a href="/yellowleather/products/hats/leather-hat">
    <div class="views-field views-field-uc-product-image">
      <div class="field-content">
        <a href="/yellowleather/products/hats/leather-hat">
      </div>
    </div>
    <div class="views-field views-field-display-price"> <span class="views-label views-label-display-price">
    </div>
  </td>
</tr>
```

Rationale for Change

- Outdated data retrieving tool
- Growing data needs

How: Temporary Pause on Ad Hoc and New Requests

To facilitate this transition, we have decided to temporarily pause ad hoc requests until June 30.

Reasons for the Pause

- **Time Required for Skill Acquisition:** Learning new tools and languages takes time and dedication.
- **Reduction in Staff:** With Block grant ending soon, it is likely we will lose NANCE support.
- **Full plate:** We have enough projects in our queue to keep us busy through the beginning of the Fall.

Benefits of the Transition

- Data automation → faster access to new data
- New partnerships with research team to unlock actionable insights

Next Steps

- **Ad hoc projects on hold:** We will pause ad hoc projects during this transition period.
- **We are not clearing our plate:** We will continue to fulfill our existing commitments, which include 30 ongoing projects already in our Spring Research agenda.
- **Continued support of mandated reports.**
- **IE Request form remains open:** The service request will remain open to capture new request. They will be added to queue but will not be reviewed until July.

Thank you for your understanding
